

INSTRUCTIONS: ILLUMIDOME Mini Waterproof Lantern

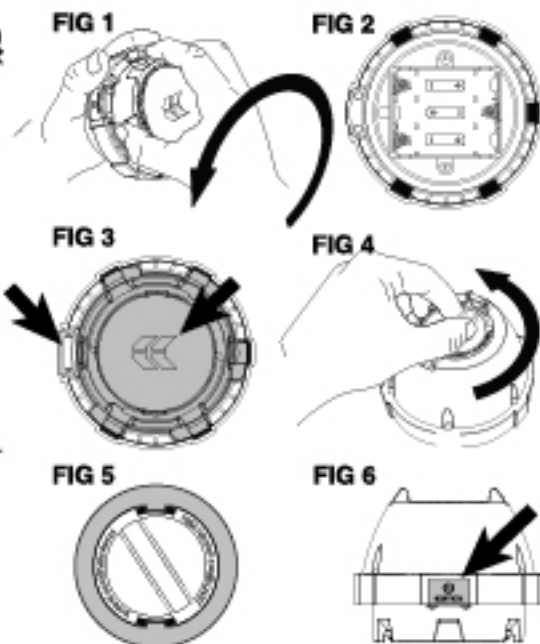

Installing the Batteries

Removing the Base

- 1) Rotate the base counter-clockwise by gripping the black outer base surface (FIG 1)
- 2) Pull the base straight off to access the batteries
- 3) Align the batteries as shown by the icons in the battery holder (FIG 2)

Attaching the Base

- 1) Align the arrow with the switch and set the base gently on top of the lens assembly. (FIG 3)
- 2) Rotate the base counter clockwise, 30 degrees, until the base drops into the lens assembly.
- 3) Press down firmly and rotate the base clockwise into the locked tab position.
- 3) The ILLUMIDOME will now reflect light like a traditional lantern.

Changing the Light Type

Lantern Light to Dome Light

- 1) With your thumb and forefinger, use the two ribs to twist the reflector counter-clockwise (FIG 4)
- 2) The ILLUMIDOME will now allow light to project up and outwards
- 3) You can also remove the Velcro strap for more light output (Velcro strap and reflector store in the base).

Dome Light to Lantern Light

- 1) Align the slots in the reflector with the tabs (FIG 5)
- 2) Using the ribs twist the reflector until it locks in place
- 3) The ILLUMIDOME will now reflect light like a traditional lantern

Storing the Reflector and Velcro in the Base

- 1) Remove the base (See Installing the batteries directions)
- 2) The base has an outer ring where the Velcro strap can be stored
- 3) The base has a concave cup in the middle to lock the reflector in place for storage

Changing the Light Modes

- 1) Press the Power Switch with the power icon and STKR® logo (FIG 6)
- 2) Each button press will toggle through the light settings
 - Low Brightness: 25 Lumens Runtime: 160 hrs
 - Medium Brightness: 100 Lumens Runtime: 80 hrs
 - High Brightness: 220 Lumens Runtime: 24 hrs
 - Rapid Hazard Brightness: 220 Lumens Runtime: 60 hrs
- 3) Turn off the light by cycling through all the power levels, or hold the power button for 1.5 seconds.

Waterproof

- * The ILLUMIDOME does float on water, and is designed to be waterproof to level IP-6, but it is not designed to withstand the water pressure of being fully submerged. If using it in water, do not dunk the light. The additional water pressure may cause leaking.

WARNING

(1) Choking Hazard. Small parts, not for children. (2) Do not dispose of batteries in fire - may explode or leak. (3) Do not mix old and new batteries, do not mix alkaline with non-alkaline batteries. (4) Batteries are to be inserted with the correct polarity. (5) Replace all batteries at same time (6) If swallowed, promptly see doctor (7) Do not look directly into intense beam of light. (8) Always wear safety goggles, user, and bystander.
